Architecture: RESTful APIs - GraphQL - Linux/Unix - CMS
Workflow: Git - GitHub - Heroku - Travis CI - Agile
Testing: Jest - Mocha - Chai

Projects

Now What!?
Media recommendation app, built from scratch, with the ability to track user's favorite movies, games, artists, and recommend new titles for them to enjoy. My main areas of focus included frameworking, testing, building various components including search view and homepage.

Repo Live App

Crate
Monthly clothes subscription service. Our job was to read through an existing codebase and extend existing functionality, including adding testing to existing code. My main areas of focus included integration, frameworking, testing, building various components including profile editor and shipments view.

Repo

Education

Turing School of Software and Design / Front End Engineering
JANUARY 2020 - AUGUST 2020, DENVER, CO / REMOTE

- Developed 15+ web applications over the course of a 7 month, full-time plus program

- Followed an agile workflow, often working within a team environment, in order to create programs both following a design document and of our own design

- Learned web design, HTML, CSS, JS, jQuery, React, Redux, GraphQL, and Git

Work Experience

BestFit, Inc. / Front End Engineer
FEB 2021 - PRESENT, REMOTE

- Leading development of a new customer-facing dashboard, including refactoring and updating existing pages and building new pages from scratch

- Working closely with a UX designer to refresh the design of existing pages, including removing old technologies

Software Engineering Fellow (Front End)
OCT 2020 - JAN 2021, REMOTE

- Refactored core UI elements out of an existing project and into a reusable component library

- Designed and implemented a new component testing suite that automated accessibility tests, improved performance, and reduced technical debt utilizing Storybook + Chromatic

- Collaborated on the build of a new customer-facing dashboard utilizing React + GraphQL through Gatsby

Target Corporation / Tech Consultant
JULY 2019 - JAN 2020, WESTMINSTER, CO

- Routinely assisted 50+ guests per day in finding the right technology for their needs and adapting solutions towards their own goals
- Performed setup on new technology including phones, tablets, etc
- Balanced stock of existing product
