Jose Lopez

I am a software engineer that wishes to create my own video game one day. Until then, my goal is to work my hardest to learn and grow as a developer. As of now, my previous jobs were in sales which allowed me to become more flexible in new enviroments and as well as getting use to interacting with new people.

📍 19000 Ne 3rd St, APT # 402, Miami, FL 33179

Work Experience

Home Depot

From: 09/2018, To: 11/2019

I was a sales associate, helping out customers with all their needs, and made sure the customers leave the store satisfied.

- I learned how to adapt when it comes to new environments and as well as with interacting with others
- I experienced first hand working with a team

Educational History

Turing School Of Software & Design

Back-End Developer Certificate

From: 08/2020, To: 03/2021

Skills Summary

- *Ruby on Rails*
- *Active Record*
- *SQL*
- *Web API Experience*
- *Problem Solver*
- *Detail Oriented*
- *Excellent Teamwork*
- *Adaptable*

Projects

Viewing Party

https://github.com/SageOfCode/viewing_party

In this project, we were split into teams of 3 and 4, in order to create an app that consumed an API of a movie database. With this information we were to allow our guests to create an account, allowing them to add other users as well. A user had the ability to search through movies and create a party for a movie of their liking in order to invite friends, for they can watch it together.

Relocate

https://github.com/orgs/Relocate08/dashboard

This project was our first big group project with over 10 classmates. It gave us the experience on how it was going to be when we had this many people in our jobs. We split the project down into 3 different groups. We had our front-end, our back-end, and our micro-service. We split into teams of 2-4 and every 4 to 5 days we would change where we worked on in the project for we can get experience with each part of the application. The project helped people that were traveling to a new location by making it easier to move by providing them with utilities, recreation, and other services that the user was looking for in one location.
