Brylan Gannon

Ruby on Rails Developer with a background in Customer Service, Inventory Management, and Maintenance.

Mobile Phone: (720) 688-4063 | **Email:** **brylan.gannon112@gmail.com** | **Github** | **LinkedIn**

SKILLS

- **Backend Development:** Ruby | Rails | RSpec | Python | Flask | SQL | Relational Databases
- **Version Control:** Git | GitHub | GitHub Projects
- **Others:** Inventory Management | Customer Service |

TECHNICAL PROJECTS

DevPrep | Group Project | Github Organization | 12 days |

Description: an app to help Turing students prepare for the job with flash cards, and Codewars stats

- Designed, tested, and produced a SOA based web-application on a full stack team of 8 people
- Studied and implemented a brand new language (Python and Flask) in 6 days

Sweater Weather | Solo Project | GitHub Repository | 5 days |

Description: A pure backend api to get weather and road trip information on any location in the world

- Consumed and aggregated data from multiple different API endpoints
- Exposed a RESTful JSON API

Dungeonball (Turing Consultancy Project) | Group Project | GitHub Organization | 12 Days |

Description: Form parties of NFL players with theoretical D&D statistics based on data from Madden21 and Twitter

- Implemented microservices and AGILE workflows, consumed and exposed API endpoints
- Led the backend development team, assisted the Docs and Frontend team as needed

EXPERIENCE

Denver Botanic Gardens — *Facility Custodial Technician* — **March 2020 - November 2021**

- Cleaned, performed groundskeeping, and installed furniture for up to 12 weddings per day, each wedding often consisting of 200+ people
- Assisted in set up and maintenance of the 2021 Sabor Festival, which consisted of over 2000 guests, and generated over $7 million in revenue

Sprouts Farmers Market, Lakewood CO – *Assistant Bakery Manager* – **April 2017 - November 2019**

- Practiced team building and agile workflows
- Developed a routine with the manager in order to increase sales: within 2 months we increased the weekly profit of our department by 300% from the previous year

EDUCATION

Turing School of Software and Design, Denver, CO – ***Certificate of Completion in Backend Engineering***

January 2022 - August 2022

- 1500 hours of software engineering experience over a 7 month, ACCET-accredited program
- Focused on Object Oriented Programming using Test Driven Development
- Created over a dozen projects in both solo and group development settings.
