Users can read curated news articles on topics of their choice, then take action

- Worked with a group of 7 and utilized agile techniques
- Implemented GraphQL for the first time
- Tech Stack: Ruby on Rails, CircleCI, GraphQL

Sweater Weather, solo project, [GitLab](#)

Users can hit the various endpoints to get weather and trip details from the api.

- Built out all api functionality
- Takes in multiple apis and aggregates them
- Tech Stack: Ruby on Rails, Rspec, Git

Rails Engine, solo project, [Github](#)

Users can use the various api endpoints to receive information on fictitious merchants and their items

- Started the application from scratch and built out all functionality
- Tech Stack: Ruby on Rails, Rspec, Git

Connect 4, Paired project, [github](#)

Users can play a game of connect 4 in the command line

- Ruby application that allows you to play a game of connect 4
- Tech Stack: Ruby, Rsepc, Git

Curious and Excited Software Engineer focused on delivering quality software that puts functionality first.

I can take hard problems from conception to production.

A passionate, agile collaborator, I understand that the team succeeds together.

I have an intellectual curiosity that fuels a fanatical devotion to skills improvement and constant learning.

Education

Turing School of Software and Design, Denver, CO

March 2022 - Present

- Created full stack web applications and APIs in Ruby on Rails.
- Deployed Agile techniques in teams of up to seven programmers, and collaborated with Git, and GitHub.

Bradley University, Peoria, IL

Aug 2016 - May 2020

- Completed a bachelors in Economics and English, and a Masters in English.
