[linkedin.com/in/rsteckline](https://www.linkedin.com/in/rsteckline)

Former Executive Pastry Chef with 15 years of experience in prestigious and cultural institutions, combining innovative problem-solving, precision and team management skills. Now a Front-End Software Engineer, strategically applying these strengths to develop accessible, user-friendly digital solutions for impactful, inclusive technology.

SKILLS

Languages & Frameworks: React, JavaScript, Router, HTML, CSS, Tailwind, TypeScript, Context API
Systems & Practices: Git/GitHub, Test Driven Development (Mocha/Chai), Cypress, Agile Processes, GIS
Workflow: Accessibility Practices, Debugging, GitHub Projects, Notion, Figma, Trello, Adobe, UI/UX

PROJECTS

Belongea's Boulangerie, Solo Project | [GitHub Repository](#) | [Deployed Site](#)

Tech Stack: Javascript, Typescript, React, Router, Cypress, Postman, CSS, HTML, Leaflet, Notion, Miro, Vercel

Collaborated on an interactive global bread history and recipes app, showcasing delicious culinary diversity.

- Worked closely with back end team to establish proper contracts ensuring consistent data management
- Utilized Leaflet for dynamic map integration, enabling interactive exploration of global bread information

Startup Scouter, Solo Project | [GitHub Repository](#) | [Deployed Site](#)

Tech Stack: Javascript, React, Router, Cypress, Postman, CSS, HTML, Notion, Trello, Vercel

Developed a job search app for YC startups in an 8-hour sprint, enhancing user job search efficiency.

- Utilized API integration to optimize data retrieval and elevate global state management
- Crafted intuitive user interface with streamlined site navigation to enhance user accessibility

Rancid Tomatillos, Group Project | [GitHub Repository](#) | [Deployed Site](#)

Tech Stack: Javascript, React, Router, Cypress, Postman, CSS, HTML, Figma, Notion, Vercel

Created a movie application enabling users to search and view information for movie selection.

- Optimized architecture setup and UI/UX design planning using collaborative tools for efficient workflow
- Implemented robust end-to-end testing environment to validate features and ensure error handling
