Language: JavaScript, ES6, HTML5, CSS/SCSS, TypeScript *Testing:* Mocha/Chai, TDD, Cypress, E2E
Framework: React *Design:* UI/UX, Figma *Work Flow:* Git, GitHub, GitHub Projects

PROJECTS

Your EPK - [Repo](#) | [Deployed](#)

An application for indie film producers to create a professional electronic press kit.

TypeScript, SCSS, HTML5, React, ReactRouter, Material UI, Cypress, AWS S3

- Contributed on a full-stack team to plan and build the application from scratch utilizing strong design and organizational skills on Figma, Notion, and GH Projects
- Agile workflow using GitHub Projects and daily stand-ups to ensure successful collaboration
- One of three projects selected out of nine to complete in Turing School's Demo Comp; A friendly competition to show off the application to industry professionals

project•HTRAE - [Repo](#) | [Deployed](#)

A quick reference application for climate change impacts.

JavaScript, CSS, HTML5, React, ReactRouter, React vis, Cypress

- A solo project, designed and built using data from a RESTful API
- Utilized local storage for "saved tips" to persist on page reload for better UX
- Implemented React Vis graphs to display information seamlessly

EXPERIENCE

REI, Ops Sales Lead, Lakewood, CO ◦ Sept. 2020 - Mar. 2021

- Promoted sales and memberships to customers daily
- Demonstrated efficient management system and increased staff productivity by creating an organizational structure for the shipping area
- Trained 10 new hires and mentored staff, provided direction, and coordinated task execution

Kohls, Visual Merchandiser Lead, Hingham, MA ◦ July 2019 - June 2020

- Oversaw floor set changes monthly and worked with department supervisors to ensure correct and timely installations
- Planned for short and long-term projects and workloads including setting 70 mannequins
- Strategized implementation and organization of capital projects in a fast-paced environment that exceeded regional company standards
